DETAILS OF COMPLAINT:

1. Describe your complaint in detail and the events that led to your complaint.
Include dates and location of treatment, medications prescribed:

This patient was born via vaginal breech at CyFair Birth Center. Practitioners listed were Patricia Ghaly and Megan Robinson. The note details that the baby's bottom was delivered at 6:52 and the head was not delivered until 7:04, 12 minutes later. The baby needed resuscitation at birth including positive pressure ventilation. EMS was called and the baby was taken to the hospital. The baby underwent total body cooling due to concern for hypoxic ischemic encephalopathy. The baby developed pulmonary hypertension and was on inhaled nitric oxide until day of life 25. The EEG was very abnormal, and MRI showed diffuse hypoxic-ischemic injury. The injuries sustained due to head entrapment for 12 minutes and subsequent delayed resuscitation will be permanent and may be life-threatening.

2. Have you received a second opinion from another physician?: No

If so, please give:

Name of Physician: Timothy Bohan, pediatric neurologist
Physician's Address: Woman's Hospital of Texas
